# critical settings

USING THE APP

## Battery and device care

please check the settings under this tab, according to the following steps

**After updating the Android OS to the latest version, please verify these critical settings are correctly set.**

**The settings define how the app performs while the phone is charging and can dramatically alter the quality of the footage recorded or cause unwanted lags in the app**

USING THE APP

Access the app by scanning the Event QR code received from the iRewind team before the event.

Please note: you should check that you are scanning the correct QR Code you were provided and that the code is still active when scanning.

## Scan Event QR code

Scan the QR code to be able to use the app for a specific event, to record / upload footage

Example QR Code format:

[1242] Test\_IRWOne\_Admin2  
Expires at: 2022/07/20 10:27:00

### Profile

Detailed info about camera, device & app

### Camera ID

Automatically allocated Camera ID number, for the particular event scanned

### Event name

The event name displayed

### Start Recording

Press "Let's Go" to access the event and start recording / uploading

# event details

USING THE APP

After the successful scan of the Event QR code, you will be logged into the event and have information about the event displayed on screen. You will then be able to search for that CAM ID in the **iRewind Admin Panel**, under your particular event, in the **Reporting/Camera Locator**

You will need to do that for every new event / for every new camera used at an event.

## SETUP

- Event Details

## FILMING

- Record
- Settings
- Upload
- Finish event

### Recordings timeline

The dates & timeline of the video recordings for the particular event

### Upload details

Settings & information on footage uploading

### Finish Event

Once the footage is 100% uploaded, you can Finish the event and start a new event

# upload

USING THE APP

After the successful upload of the footage, you can advance to a different event.

**Note:** Finishing the event will close the event and log you out of it. Please make sure you finished uploading, otherwise you will need to Renew the QR code (scan the event QR code again) to return to it

## SETUP

 Critical settings

 Install

 Log in

 Event Settings

 Event Details

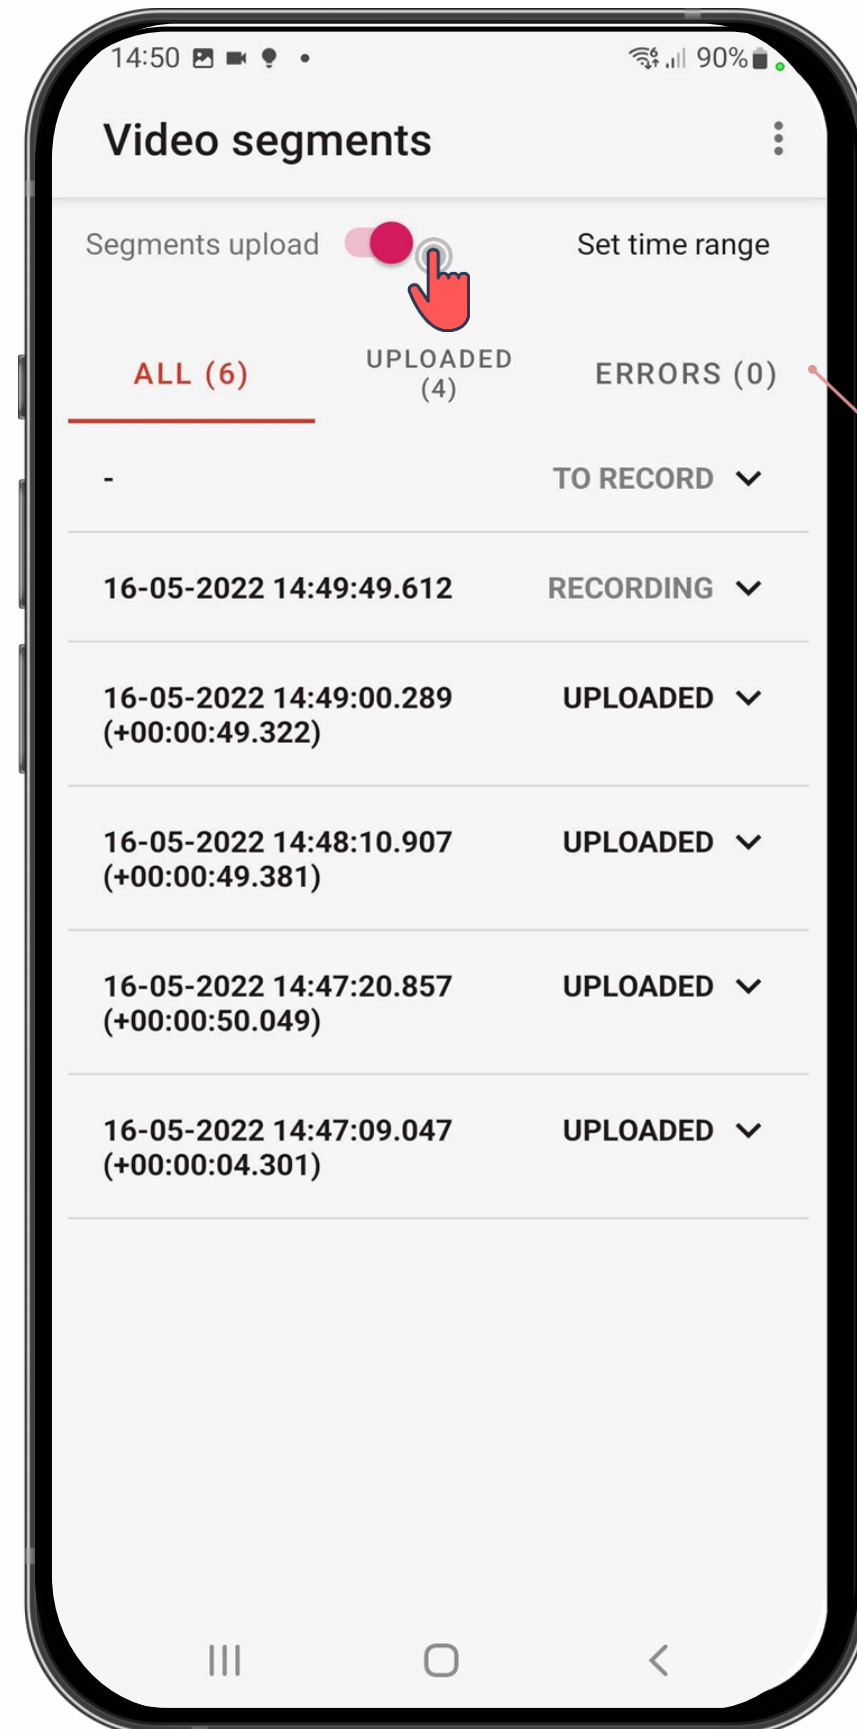

## FILMING

 Record

 Settings

 Upload

 Finish event

### Segments upload

by toggling on/off the upload button, the camera will start uploading in the cloud the footage filmed to that point.

At the end of the upload process, the **ALL** no. of segments should match the **UPLOADED** + **ERRORS** segments.

You can filter by date/status of the segments by clicking the Menu button (top right).

# upload

USING THE APP

After the race is finished, you can upload the footage ("segments") from the Upload menu

**Please note:**  
if the Segments Upload button is toggled on, the footage can also be uploaded during the recording process

## SETUP
